

**ERRATA – No. 2 for
Response to Comments**
January 2004
And
Recovery Strategy for California Coho Salmon (*Onchorhynchus kisutch*)
Report to the Fish and Game Commission
Public Review Draft
November 2003

1. Response to Comments:

The following sentence in Section 7.24 was mistakenly inserted in Alternative A of the Timber Management Alternatives, and has been removed from the final document: “Section 13 has also been included in Section 7.18 of the recovery strategy as a range-wide recommendation for Permitting.” This sentence appears in the paragraph excerpted below and is shown in redlined strikeout. The recovery strategy includes other range-wide recommendations addressing streambed alteration agreements (e.g., RW-I-D-05 and RW-XXXIII-A-01).

7.24 TIMBER MANAGEMENT ALTERNATIVES

ALT-A	This alternative is from a recommendation presented to the CRT by Petitioner members of the CRT. <u>Section 13 of it</u> has been modified slightly as indicated by <u>in response to public comment in that the previously underlined text has been deleted.</u> The <u>Department does not view this as a substantive change.</u> Section 13 has also been included in Section 7.18 of the recovery strategy as a range-wide recommendation for Permitting. Citations to the Forest Practice Rules (FPR) have been clarified. Amendments made since <u>the publication of the November 2003 Public Review Draft of the recovery strategy</u> are indicated by underline and strike-out.
